

**KENNETH A. BIONDI**  
**Project Manager & Estimator**

---

- **Project Management**
- **Construction Management**
- **Project Scheduling / Cost Estimating**
- **Business Development / Proposals**

In his capacity as both a senior project manager and cost estimator working with Hallen Environmental Services, LLC., Mr. Biondi has responsibilities for the project and construction management for the contracts he is assigned that includes the costs, safety, schedule, productivity, and quality of performance to complete the work at hand. Additionally, he has responsibilities for the preparation of cost estimates, change orders, task orders, proposal writing, and schedule preparation for bids and projects in the utility, construction and environmental industry.

**Experience:**

Mr. Biondi has more than 39 years of project management and estimating experience in the general construction and utility construction fields, including directing field operations and project management, cost estimating, construction oversight and supervision on the planning and rebuilding of both elevated and below ground active subway stations for The Metropolitan Transportation Authority's Long Island Railroad and New York City Transit Authority Divisions. Mr. Biondi maintains his credentials as an approved project manager for The Metropolitan Transportation Authority.

Mr. Biondi has worked on and completed general construction and utility construction projects in the New York Metropolitan and Tri State Areas, primarily on Long Island and in the City of New York. Projects managed have ranged in size, complexity and value from \$ 700 k to \$ 38 mil.

Mr. Biondi has been responsible for the preparation of estimates and project management of general construction and utility construction projects consisting of a work force of as many as 85 highly trained construction tradesmen on a single project, construction equipment and crews working on numerous projects simultaneously. Responsibilities have included construction schedule planning, bid and proposal preparation and review, subcontracting and budget/scheduling and project management on major Metropolitan Transportation Authority, state, county, local town government and public and private sector water and sewer district projects.

Mr. Biondi has been involved in projects utilizing a wide variety of trench excavation techniques, installation of water main, gas main, sewer and drainage pipelines, the installation of process piping and equipment at waste water treatment plants and potable water treatment plants, rehabilitation of existing pipeline systems utilizing insitu relining and manhole rehabilitation in active sewer systems, trench dewatering and treatment, active sewage pump station rehabilitation, installation of sewer and potable water treatment equipment. His environmental experience includes but is not limited to the project management and construction management of the installation of gas recovery systems at municipal landfills, excavation, loading, hauling and disposal of contaminated soil on numerous sites.

His previous experience includes:
