

JAMES O'HAGAN
Facility Operations Supervisor

- **Owned Equipment Fleet Maintenance**
- **Facility Maintenance**
- **State Vehicle Inspections**
- **Project Close-Out Inspections**
- **Fleet Fuel Tank Maintenance and Compliance**

Mr. O'Hagan is responsible for the day-to-day maintenance of the Maspeth, Queens, NY office and maintenance and repair of the \$ 10 mil. Hallen owned equipment fleet consisting of construction equipment, backhoes etc, compressors, trucks, vans, other vehicles and ancillary equipment in support of all of the company's field projects. Mr. O'Hagan supervises a full-time crew of mechanics that perform both field and facility based equipment maintenance and repairs. He also handles the management of the New York State Vehicle Inspection Program, fuel use tracking, documentation, inspection, maintenance and compliance for the fuel tanks at our facilities.

Additionally, with his vast experience, Mr. O'Hagan has responsibilities to support projects directly by conducting post completion quality inspections focusing on paving, restoration and site safety to document compliance with the company quality protocols and ensure Client requirements are met or exceeded.

Mr. O'Hagan is in daily communication with the company's Island Park, Long Island office, our project managers and superintendent and vendors, assisting in their needs to expedite the cost effective completion of projects.

Experience:

In his current position with the company for over 6 years Mr. O'Hagan brings with him 33 years of previous experience with KeySpan Energy and its predecessor, Starting in 1967, Mr. O'Hagan rose through the ranks retiring from KeySpan Energy in 2000 holding the position of General Foreman/Operations Planner responsible for all underground gas utility repair and maintenance in his assigned territory. His experience included working in sales, customer service, quality control, documentation, and supervision on field projects in support of Utility construction, leak detection, rehabilitation and new service installation. Mr. O'Hagan has also been sought and testified as an expert witness for KeySpan Energy.

Mr. O'Hagan played a critical role in the successful dispatching and resource management in the September 11, 2001 World trade center project in supporting the maintenance and repair of equipment deployed to complete the around-the-clock frenetic activities to disconnect and reconnect utilities after the terrorist attack.

Mr. O'Hagan served in the United States Army from 1965 through 1967 attaining an Honorable Discharge.
